

For the purposes of this Section 3.01, the following terms have the meanings set forth below:

“U.S. Company” shall mean:

- (a) a company (i) that is incorporated in or organized under the laws of a state in the United States or that has located its corporate headquarters or principal place of business in the United States, and (ii) that is not a subsidiary or division of a corporation or other entity that has its principal place of business outside the United States; or
- (b) a company that is a manufacturer of satellite-related products that is a subsidiary or division of another manufacturing company that is headquartered or has its principal place of business outside the United States if:
 - (i) its principal manufacturing activities take place at locations within the United States, and
 - (ii) it is not owned or invested in by non-U.S. government entities; or
- (c) a company that is a satellite system operator that is a subsidiary or division of another satellite system operator that is headquartered or has its principal place of business outside the United States if:
 - (i) all or a substantial portion of the subsidiary’s or division’s space segment is licensed by the U.S. Federal Communications Commission (FCC); and
 - (ii) at least 20% of the ownership of the subsidiary or division is held by U.S. persons or entities.

“Licensed by the FCC” shall mean an authorization issued pursuant to Title III of the Communications Act of 1934, as amended, entitling the holder to operate a space station at a particular orbital location or in a particular orbit or orbital plane, and shall not include FCC decisions permitting space stations licensed by non-U.S. telecommunications authorities to serve the United States (e.g., FCC decisions adding space stations to the permitted space station list).
